COMMUNITY FEATURES

TRAVEL/TRANSPORTATION

Livingston is located near several airports and train stations, allowing the City to prosper from out-of-town guests and visitors.

- Airports
- 08 miles: Turlock Muni
 - 11 miles: Castle (Atwater)
 - 17 miles: Merced Muni
 - 19 miles: Gustine
 - 23 miles: Modesto
 - 50 miles: Stockton Metro

- Amtrak Stations
- 12 miles: Turlock-Denair
 - 18 miles: Merced

RECREATION

Guests who stay at Blueberry Crossing’s hotel will benefit from the surrounding area’s multitude of recreational opportunities. Outdoor activities are unlimited as the development site is nearby many lakes/camp sites, golf courses and ski resorts. Nearby attractions include:

- Lake Honda – 13 miles
- Buttonwillow Lake – 14 miles
- Yosemite Lake – 15 miles
- Ruth Lake – 15 miles
- Big Water Lake – 16 miles
- Turlock Lake – 19 miles
- Rancho Del Rey Golf Club – 4 miles
- Stevinson Ranch Golf Club – 17 miles
- Forebay Golf Course – 25 miles
- Pheasant Run Golf Club – 27 miles
- River Oaks Golf Course – 29 miles
- Dodge Ridge Ski Resort – 68 miles
- Badger Pass Ski Resort– 70 miles
- Kirkwood Ski Resort – 85 miles
- Heavenly Ski Resort – 101 miles

AGRICULTURE

The area is best known for its agriculture. Merced County creates \$1.75 billion in agricultural products. Livingston is specifically distinguished for its grape, dairy and chicken/turkey production. Major employers and national branded companies, E&J Gallo Winery, Joseph Gallo Dairy and Foster Farms, have grape pressing, dairy and poultry plants near Livingston.

COLLEGES/UNIVERSITIES

Livingston is located near several large colleges. California State University, Stanislaus and UC Merced are well-known for it’s commuter student base.

- 4 miles: California State University Stanislaus (Turlock)
- 16 miles: Merced College
- 23 miles: UC Merced

ABB

ABOUT ALLANA BUICK & BERS

Allana Buick & Bers, Inc. (ABB) provides award winning architectural engineering expertise in solar engineering, energy efficiency, exterior facade design, roofing systems, waterproofing systems and construction management related services.

For over 20 years ABB has brought value and innovative solutions to the design and construction industry resulting in sustainable, efficient and long lasting buildings. We have a legacy of satisfied owners, developers, architects and contractors that have benefited from our specialized solutions.

ABB ENERGY SOLUTIONS

Sustainable and durable buildings with low operating costs have long been integral to ABB's core values. These beliefs were part of our mission long before it became an industry trend.

ABB strives to reduce the construction community's environmental impact and lower its energy consumption.

We've repeatedly proven that integrating sustainable solutions in new construction and building modernization projects increases longevity, benefits the environment and ultimately improves our clients' financial internal rate of return.

ABB offers the following sustainability and energy solutions:

- Solar Photovoltaic (PV) Solutions
- Solar Thermal Energy Solutions
- HVAC Optimization Solutions
- Energy Audit Solutions
- LEED Solutions
- Alternative Energy Solutions (Geothermal, Biomass, Wind, etc.)

THE VILLAGE AT RIVER PARK

Considered the finest center of its kind in Northeast Fresno's Class A Office market, this mixed-use project integrates offices with dining and banking along the highly-traveled Freeway 41 corridor. Offering excellent visibility from Freeway 41 and its more than 100,000 vehicle trips per day, the campus is host to more than 20 tenants, providing close proximity to five additional office buildings within 2 blocks.

The Village at River Park campus is located just across Freeway 41 from the River Park shopping center. River Park is an outdoor, lifestyle shopping center featuring more than one million square feet of retail and restaurant space.

Valley Excellence

**Making Stanislaus County
a better place
to live since 1969.**

mid-valley engineering
is a Land Development Solutions firm that provides Land Planning, Entitlement, Engineering, Surveying and Construction Staking services. We have served the greater San Joaquin Valley since 1969 and pride ourselves on being an integral part of shaping our community – making it a better place to live, work and play.

CONSTRUCTION STAKING

Accuracy is vital to your project's successful outcome. MVE combines experience – our average party chief has more than 10 years in the field – and cutting-edge technology to deliver data you can trust, making MVE the premier mapping and surveying team on the West Coast. We also provide one of the quickest response times in the industry, typically 24 hours.

Our 15+ field crews utilize the newest, high-tech surveying equipment and electronic data collection methods to ensure accuracy and cost-efficiency time after time. Our technical office personnel rely on a computer-aided design and drafting (CADD) system for all phases of land surveying work, which interfaces perfectly with the GPS used by our field crews for a fully-integrated design.

MVE currently works with the largest developers and contractors in the country, but services smaller firms with the same professional service. We have built a reputation for being proactive, circumventing potential problems and often saving our clients significant costs. We are also expert project managers who have established positive and productive relationships with contractors.

FEATURED PROJECT: PRINCESS CRUISES®

Princess Cruises has been one of our most devoted customers. Every six months, we create new embroidery designs for their ports around the world. On average, we develop about 80-85 designs. Once the buyer approves the designs, our embroidery department begins digitizing and provides sew-outs for review. When finalized, we begin embroidery production on the hats of their choice. We are happy to work with Princess Cruises and appreciate their business. Click on the thumbnails below to view the designs.

Network Providers

Reach People The Rapid Announce Way

Rapid Announce is a voice messaging system allows you to reach thousands of contacts with personalized messages within minutes. Rapid Announce gives you calling speed and capacity without any capital outlay. Rapid Announce is web-based, so there are no set-up fees, no hardware to buy, no software to buy, no maintenance costs, no minimum usage requirements, no training or service fees, and no recording costs.

Our Web based framework allows you to conduct your campaign from any location, at any time, using a computer connected to the internet. Not only does Rapid Announce offer the most cost effective means of mass communication, we also provide personalized attention; by continuously, adding features that our customers request. Reach people quickly, easily, and cost-effectively... the Rapid Announce way.

To get started [Click Here](#) for a no obligation Demo.

Rapid Announce... Simple, Efficient, Effective, Economical

Simple

Since Rapid Announce is web-based, it is easy to establish an account and begin conducting messaging campaigns. Only a telephone or a web-enabled computer is required to obtain a user name and password. Once you establish your account, you can easily create a call group, record your message, and send the message at your convenience. [Learn More...](#)

Start Today

**Test Drive
Rapid Announce
with a 10-Day Trial**

Take Rapid Announce for a 10-day test drive, the specifics are below.

Rapid Announce does not use VoIP; all incoming and outgoing lines are T1 telephone line service so your contacts will benefit from a clear crisp call on every call. Usage is good for the 48 contiguous States and District of Columbia, does not include AK, HI or US Territories. During the trial period usage is (\$.05) 5 cents per minute. Usage billed in increments of 6 seconds and you pay only for usage on the connected calls.

The usage is in blocks of 1000 minutes (1000 x \$.05) \$50 payable in advance with a credit card (MC, Visa, Discover, and Amex). The minimum block is 1000 minutes. [Learn More...](#)

In 1990, ASA decided to build a state-of-the-art alloy wheel manufacturing facility. Knowing the complexity and challenge this presented, ASA went to BBS in Germany to tap the best technical knowledge in facility design, manufacturing processes and quality controls for producing high quality alloy wheels. Their agreement with BBS, a world leader in wheel technology, engineering and manufacturing with over two decades of success in the racing community and the high-end aftermarket worldwide, is still in effect today. The ASA name, Artisan Spirited Alloy, is reflected in their exotic, elegant, and exciting wheel designs.
